

PUMP SPECIFICATIONS:

Pump Model:	: Dp-75J
Work Pressure	: 5-10 Bar
Suction x Discharge	: 3" x 2" (75 mm x 50 mm)
Max. Head	: 40 mtr
Shaft Seal	: Mechanical Seal JOHN CRANE U.K
Capacity	: 32 HP
Speed	: 1500 RPM

MODEL: DP-75J

ENGINE SPECIFICATION:

The Kirloskar HA 394, a 3-cylinder, 4-stroke, air-cooled diesel engine engineered for high-performance and reliability in tough working conditions. Delivering approximately 35 HP at 1500 RPM, this engine provides the consistent power needed for jetting operations such as borewell drilling, pile cleaning, and construction site flushing. Its air-cooled system ensures uninterrupted operation without the need for water-based cooling, making it ideal for use in remote and challenging environments. Durable, fuel-efficient, and easy to maintain, the HA 394 is a trusted choice for heavy-duty jetting applications.
